DKSH and LAUDA Partner to Launch LabPRO Cooling Thermostats for Reliable Laboratory Temperature Control

DKSH developed in partnership with Lauda the new LabPRO Cooling Thermostats. This thermostat combines proven temperature control expertise with sustainable, cost-efficient, and user-friendly operation for essential laboratory applications.

Singapore, May XX, 2026 – DKSH Technology with its brand LabPRO has partnered with LAUDA, a global leader in precise temperature control technology, to launch the LabPRO Cooling Thermostats. Designed to deliver reliable temperature control from -25 to 100°C, the new product line supports both internal and external temperature control applications, using non-flammable liquids such as water and water/glycol mixtures.

The LabPRO Cooling Thermostats are optimized for essential laboratory applications and combine reliable performance with simple operation. Key features include fully electronic continuous control, low-level and over-temperature protection, acoustic and visual alarms, a stainless-steel bath, and automatic compressor control to provide cooling capacity only when needed.

Enrico Bossart, Director Product Management & Service, LAUDA, commented: “We are pleased to partner with DKSH and its brand LabPRO to bring reliable and accessible temperature control solutions to laboratories. By combining LAUDA’s proven engineering and expertise in precise temperature control with DKSH’s strong understanding of customer needs, we are making reliable cooling thermostat technology available for a wider range of essential laboratory applications.”

Marco Farina, Vice President, Scientific Solutions, DKSH, added: “This partnership reflects our commitment to providing laboratories with high-quality, practical, and cost-efficient solutions that support everyday scientific workflows. The LabPRO Cooling Thermostat delivers precise temperature control and optimized cooling performance, making it an ideal complement to rotary evaporators, reaction systems, viscometers, and a broad range of analytical instruments.”

About LAUDA

LAUDA is the global leader in precise temperature control. Its constant temperature equipment, heating and cooling systems are used in critical applications across research, production, and quality control. As a full-service provider, LAUDA supports customers in industries including laboratories, medical, pharmaceutical, biotechnology, chemical, automotive, semiconductor, and other advanced technology sectors with reliable temperature control solutions. www.lauda.de

About LabPRO

LabPRO is powered by DKSH Business Unit Technology, part of the DKSH Group. Designed to deliver Swiss precision, innovative design, and economical value, LabPRO provides laboratory equipment and consumables that support reliable and efficient daily lab operations. Its product portfolio includes pipettes, dispensers, balances, cell culture dishes, syringes, and other essential laboratory solutions for professionals across scientific and industrial laboratories. www.labpro-solutions.com

About DKSH

For more than 160 years, DKSH has been delivering growth for companies in Asia Pacific, Europe, and North America across its Business Units Healthcare, Consumer Goods, Performance Materials, and Technology. As a leading Market Expansion Services provider, DKSH offers sourcing, market insights, marketing and sales, e-commerce, distribution and logistics as well as after-sales services, following its purpose of enriching people’s lives. DKSH is a participant of the United Nations Global Compact and adheres to its principles-based approach to responsible business. Listed on the SIX Swiss Exchange, DKSH operates in 35 markets with 26,840 specialists, generating net sales of CHF 11.1 billion in 2025.

DKSH Business Unit Technology offers complete solutions for specialized scientific and industrial applications. With around 1,770 specialists, the Business Unit generated net sales of CHF 513.5 million in 2025. www.dksh.com/tec
