Innovative for a sustainable future: dormakaba at the BAU 2025 trade fair with pioneering access solutions

At the world-leading trade fair for the construction industry, BAU 2025 in Munich (January 13-17, 2025), dormakaba will present its latest developments and innovations in access solutions at Hall B1, Stand 319, under the motto "For Every Place That Matters."

The company will showcase a wide portfolio of pioneering innovations and set new standards in security, customer orientation, and sustainability. These range from an intelligent automatic sliding door system, a door assistant for barrier-free access, the digital EntriWorX Ecosystem, access solutions for critical infrastructure, to a new innovative locking system. "We invite visitors to think beyond conventional access solutions – smarter when it comes to integrating technology for seamless movement, and more innovative when designing a livable future. Our showcased products and solutions focus on a sustainable future by improving security, comfort, and environmental compatibility," explains Torsten Stolte, Managing Director of dormakaba Germany.

One example is the new automatic sliding door solution that combines comfort and aesthetics with security and energy efficiency. It ensures smooth, barrier-free access while maintaining fire protection and reducing energy costs. The new door assistant EasyAssist with low-energy drive demonstrates how entrances can be made more barrier-free, comfortable, and hygienic with less cost and effort. Thanks to its compact, clear design, this solution can be used in a wide range of settings, such as businesses, medical practices, hotels, retail stores, schools, or multi-family homes. Sustainability, innovation, and customer benefit are the main focus of all the new solutions.
