dormakaba to showcase innovative Argus V60 sensor gate at Architect@Work Barcelona

Barcelona, 29 October 2025 – On 29-30 October, dormakaba will take part in Architect@Work Barcelona 2025, a prestigious event dedicated to professionals in architecture and design. The company will showcase the Argus V60 sensor barrier, an advanced access control solution that combines technological innovation, security, and contemporary design.

Architect@Work is one of the most renowned international events for architects, interior designers, planners, and design professionals. It provides a unique platform where brands can connect with industry leaders and present solutions that meet the evolving demands of architectural design and spatial functionality.

The event will take place at La Farga Exhibition Center in Barcelona, a strategic meeting point that will bring together manufacturers, architectural firms, and design professionals from across Spain and Europe.

Innovation, security, and award-winning design

At this edition, dormakaba will highlight the Argus V60, a next-generation access control barrier that combines high levels of security with an elegant, minimalist design and remarkable space efficiency. With dimensions of just 240 mm x 180 mm, it stands as the smallest fully functional sensor barrier on the market, allowing easy integration into compact spaces such as lobbies, elevator areas, or office entrances.

Thanks to its advanced sensor technology, the Argus V60 ensures safe and reliable people flow control, maintaining personal protection and precise detection. Its integrative design enables the barrier to blend seamlessly into the architecture, resembling a refined piece of furniture within the environment.

The Argus V60's excellence in design and innovation has been recognized internationally with three prestigious awards:

- iF DESIGN AWARD 2023, one of the world's most important design distinctions, recognizing outstanding product quality and aesthetics.
- German Design Award Special 2023, presented by the German Design Council, celebrating exceptional contributions to brand and design communication.
- "Best New Wired Access Control Product" at the SIA NPS Awards during ISC West (Las Vegas, USA), the world's largest security event honoring the most innovative security technologies.

Participation in Architect@Work Barcelona underscores dormakaba's goal to create safe and secure spaces that also cater to modern design requirements. Through events like this, the company aims to strengthen its relationships within the architecture and design community, positioning itself as a trusted partner that delivers solutions combining functionality, innovation, and aesthetic appeal.
