dormakaba electronic hotel lock wins ICONIC AWARD 2025

Rümlang, 8 October 2025 – The German Design Council has been shaping the design landscape in Germany since 1953. Every year, the organization presents the ICONIC AWARD to recognize visionary architecture and innovative solutions. At the 2025 awards ceremony, dormakaba's Quantum Pixel⁺ electronic hotel lock was honored with the ICONIC AWARD.

The digital product solution increases convenience for hotel guests. Modern technologies such as NFC, RFID, Bluetooth® Low Energy, and digital wallets enable contactless access to guest rooms with special ID cards or smartphones. In addition, the Quantum Pixel⁺ fits elegantly into new and existing doors with its slim design. The smart lock electronics can be integrated directly into the door leaf, so only the flat round reader and the door handle are visible. Hotel management also benefits. The solution makes processes more transparent and simplifies access control by assigning access rights digitally.

"Global technological and user-centered aspects are decisive in the design. The presentation of the prestigious ICONIC AWARD to our Quantum Pixel⁺ electronic hotel lock shows once again that dormakaba brings innovative solutions with high customer benefits to the market," says Bernhard Heitz, Head of Strategic Product Design at dormakaba. "Congratulations to the entire development team on this product solution!"

Bernhard Heitz was on-site to receive the award at the ceremony in Munich on October 7, 2025.
